

WEBINAR

Safe Injection Practices and IV Push Guidelines 2020

(Webinar T7046)

Date: **Tuesday, August 4, 2020**

Time: **9:00 – 11:00 a.m. CT**

Speakers:

Sue Dill Calloway

Cost: \$195 to NHA members (per hospital, no charge for additional lines, recordings available up to 120 days after the webinar)

Target Audience

Chief Medical Officers, Medical Staff leaders, Chief Nursing Officers, Chief Operating Officers, Infection Preventionists, Nurse Educators, Quality Leaders

Course Curriculum

Do you know what the 10 CDC safe injection requirements are and how to ensure you are in compliance? Do you know what the rules are for multi-dose vials? Does your staff know what cannot be taken into patient rooms, including the OR? Do you know what the beyond use date (BUD) is and what other information must be included on medication vials?

Injection safety, or safe injection practices, are measures taken to ensure that injections are performed in an optimally safe manner for patients. This is especially important in light of a number of cases where patients have died or suffered an adverse event in the past year. This program will review the Centers for Medicare & Medicaid Services (CMS) survey memos related to safe injection practices and infection control, as well as the CDC standards. Our speaker will also cover the guidelines issued by Institute for Safe Medication Practices (ISMP) on IV push medication for adults. CMS requires hospitals to follow standards of care such as those issued by ISMP.

Learning Objectives

At the conclusion of this session, participants should be able to:

- Discuss that the infection control worksheets contain a list of items that will be assessed during the on-site survey in order to determine compliance with safe injection practices for hospitals and ASCs.
- Describe the 10 CDC standards on safe injection practices that all hospitals and health care facilities should follow.
- Recall that every health care facility should have a policy on safe injection practices, and staff should be educated on this policy.
- Discuss that ISMP has published a 26-page guideline on IV push medication for adults.

Speaker Bio

Sue Dill Calloway is president of Patient Safety and Healthcare Consulting and Education company, where she focuses on medical legal education, especially Joint Commission and the CMS hospital CoPs regulatory compliance. She also lectures on legal, risk management and patient safety issues. Previously, Sue was a director for risk management and patient safety for the Doctors Company. She was the VP of legal services at a community hospital and served as the privacy officer and the compliance officer. She was also a medical malpractice defense attorney for 10 years and has three nursing degrees in addition to a law degree.

She is a well-known lecturer and the first in the country to be a certified professional in CMS. She has written 102 books and thousands of articles.

The speaker has no real or perceived conflicts of interest that relate to this presentation
