The Patrick E. Brookhouser, M.D., Memorial Lecture is jointly provided by Boys Town National Research Hospital and Creighton University Health Sciences Continuing Education.

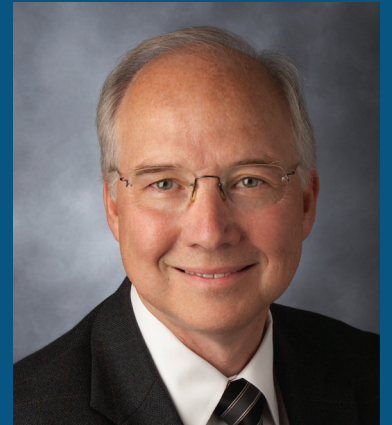

Continuing education is available and designed for:

- Physicians
- Nurse Practitioners
- Physician Assistants
- Nurses
- Behavioral Health Providers
- Residents

Patrick E. Brookhouser, M.D., founded Boys Town National Research Hospital in 1972. Since that time, the hospital has provided care and treatment to patients from across the US and a number of foreign countries. It is one of the most influential specialty hospitals and research institutes in the world. A gifted physician and surgeon, Dr. Brookhouser has been recognized by his medical colleagues for his contributions to the field of otolaryngology and otology. He also initiated groundbreaking research in the treatment and prevention of hearing loss and other communication disorders, especially in children.
