PURPOSE

Illustrate the diagnosis and treatment of common gastrointestinal disorders through case studies.

TARGET AUDIENCE

Physicians, advanced practice providers, nurses, dietitians, social workers, medical assistants, and other professionals who work with pediatric patients with gastrointestinal disorders.

OBJECTIVES

1. Identify the etiologies and mechanisms leading to malnutrition in pediatric patients and determine the prognosis for positive outcomes.
2. Identify risk factors, pathophysiology, epidemiology, and comorbidities of obesity in children and recognize the impact of a multidisciplinary weight management program on positive outcomes of treatment.
3. Recognize and classify severity of malnutrition in admitted pediatric patients and understand how management affects hospitalization.
4. Describe the journey that children with intestinal failure and their families go through and appreciate the current strategies for managing this condition within a multidisciplinary team.
