Frequently Asked
Questions

The goal of MBQIP is to improve the quality of care provided in critical access hospitals (CAHs), by increasing quality data reporting by CAHs and then driving quality improvement activities based on the data. This project provides an opportunity for individual hospitals to look at their own data, measure their outcomes against other CAHs, and partner with other hospitals in the state around quality improvement initiatives to improve outcomes and provide the highest quality care to each and every one of their patients.

This toolkit provides an overview of the goals, expectations, and measures for MBQIP, as well as resources for reporting and quality improvement initiatives.

Toolkit

State Flex Program Key Resources

This list includes key resources for State Flex Programs implementing and supporting the Medicare Beneficiary Quality Improvement Project (MBQIP).

Toolkit

General Quality Improvement Resources

This list includes quality improvement resources that can be used across a variety of project topic areas.

Toolkit

Data Reporting and Use

These resources provide information about how to submit Medicare Beneficiary Quality Improvement Project (MBQIP) data and how to interpret data reports in order to inform quality improvement efforts.

Toolkit

Care Transitions

These resources focus on quality improvement for care transitions.

Toolkit

Outpatient

These resources focus on quality improvement for outpatient hospital services, primarily those provided in the emergency department (ED).

Toolkit

Patient Engagement

These resources focus on quality improvement related to the patient experience.

Newsletter

Patient Safety/Inpatient

These resources focus on quality improvement related to patient safety and inpatient care.
