Midwest Users Group Meeting

July 25-26, 2016
Sheraton Overland Park Hotel & Conference Center
6100 College Boulevard - Overland Park, Kansas

OVERVIEW

Keeping employees appropriately trained and their skills and competencies up to date are constant challenges for hospitals and health care providers. Add the expenses associated with developing curriculum and the difficulty of scheduling and it's easy to understand why health care providers are looking for alternatives to traditional training. The objective of this meeting is to address the needs and concerns of all levels of _care_Learning users and answer questions for potential users. It will provide a forum for local users in Missouri, Kansas and Nebraska to exchange information about _care_Learning and _care_Skills, and share experiences.

_care_Learning (carelearning.com) is an Internet-based education management solution. Its sole purpose is to develop and deliver a range of just-in-time training and education for health care providers with the ability to manage and track employee, physician and non-employee records. _care_Learning is a non-profit organization operated by more than 40 state hospital associations including the Missouri Hospital Association, Kansas Hospital Association, Nebraska Hospital Association and American Hospital Association. **Hospitals that are not currently using _care_Learning and would like to learn more about _care_Learning products and/or e-learning in general are welcome to attend.**

About the Presenters

Peggy Engelkemier, RN MHA, has served as the Director of Workforce Development Solutions at _care_Learning for the past 10 years. Peggy has combined her experience and expertise as an educator and leader in a hospital environment to oversee _care_Learning course content, _care_Skills and all customer support provided to clients.

Nick Oldaker is a six-year member of the _care_Learning team, now serving as the Director of Development and Information Technology at _care_Learning. With a master's degree in management and information systems, he applies a wealth of knowledge and understanding of technology to the talent management world.
